Commercial Counsellor
Plot 333, Diplomatic, Drive, Central
Business District, ABUJA/NIGERIA

Dear ONGUN and AKYOL,

BUSINESS PARTNERSHIP TO EXPORT COAL

It is with great delight that we introduce Vickmelie Nigeria Limited to you. Our company was born out of the passion to solve problems and source out great value for our clients in all sectors especially in the mineral sector..

In our research it was discovered that turkey uses about 40 percent of coal to generate power and about 34 percent of coal is been imported because the coal mined in turkey is lignite (brown coal) which is harmful and isn't environmentally friendly.

Vickmelie Nigeria Limited tends to close the dichotomy by introducing the Nigerian coal to you, as our motto which is "bringing value to your doorstep". The Nigerian coal is generally characterized by low sulphur, medium to high calorific value, low ash and low moisture contents it's environmentally friendly.

Nigerian coals are therefore in great export demand and are most suitable for blending purposes especially with high sulphur content coals. Presently the aggregate Nigerian coal potential demand stand at about 15 to 17 million metric tonnes annually and a reserve of about 2 trillion which is located in the Southeastern and Northcentral region of Nigeria.

I urge the Turkish government to partner with Vickmelie Nigeria Limited in order to export this mineral resources which would be beneficial to your country especially in power generation. We also solicit to the Turkish government to enable us serve you in the best possible way in sourcing for much needed raw materials which can be processed into finished goods.

We humbly crave your indulgence that all courtesies accrued to this letter be reasonably considered as we anticipate a prompt and favourable response from the Turkish government in other to discuss further.

Sincerely,

Victor Chukwuemeli Egenti
CEO/MD
Vickmelie Nigeria Limited
